ATTACHMENT A

SITE DESIGNATION SYSTEM FOR SOVIET SURFACE-TO-AIR

MISSILE SITES

1. This system will be applied to the existing sites in the Moscow area as well as surface-to-air missile sites subsequently identified around other USSR cities or target areas.

2. It is considered that the allocation of designators to new sites including the designation of the center point should be the responsibility of the country making the original report, each country notifying the other two of the designation.
